

Operating Systems Model Question Paper

1. Explain the process management in Operating Systems.
2. What is a Deadlock? Explain necessary conditions.
3. Explain CPU Scheduling algorithms.
4. What is Virtual Memory?
5. Explain Paging and Segmentation.
6. What is a Process Control Block (PCB)?
7. Explain Threads and their advantages.
8. What is Synchronization? Explain Mutex.
9. Explain Banker's Algorithm.
10. What is Starvation in OS?
